

Policy Statement Quality & Security & Environment

Commitment of the Management

Except for TRAMOTRANS

In the upcoming holiday period our certificates ISO 9001, ISO 14001 and VCA** will be extended for a period of three years.

In 1997 our Quality System was certified for the first time. This evolved into a well-integrated management system for Quality-Security-Environment (or abbreviated to QSE) in 2013.

This management system with continuous improvement as one of its targets has indisputably contributed to the growth of our companies. This is evidenced by the TRENDS GAZELLES 2015, a list of the 200 best performing companies of the province of Hainaut, in which TRBA takes a top 5 position.

In our opinion we need to pay permanent attention to the points below when executing our tasks.

**Manage the future changes,
Change our behaviour,
Improve our efficiency,
Implement solutions before problems arise,
Reduce the number of physical injuries,
Limit our environmental footprint,
Optimise our waste management.**

When executing the job-specific tasks, everybody should constantly make an effort to meet our permanent targets.

- Efficient planning, using our natural resources as optimally as possible;
- Delivering quality in all safety, with respect for the environment, for the demands of the customer and for the limitations that are imposed by law and due to the budget;
- Safeguarding our performances with regards to quality/security/environment;
- Permanently improve our care for quality, security and the environment;
- Undertaking to respect the rules and regulations regarding safety and environmental care as well as our non-regulatory obligations;
- Develop clean technologies that prevent pollution and reduce the consumption of energy and water;
- Train our employees and make them aware of their obligations regarding security and environment;
- Involve our subcontractors and suppliers in our pursuit of a better quality/security/environmental care.

The quality of our work, everybody's safety and our environment form the foundation for every strategic decision in our companies. Every year, we define clear targets with regard to quality/security/environment and we evaluate the achieved results. This QSE policy is regularly reviewed and, if necessary, adjusted.

We would like to ask everybody to look at the initiatives that are launched as part of this policy with a positive attitude and to actively contribute to this optimisation plan.

Stay up-to-date of the news in the company via our new website www.trba.be.

Thank you for your cooperation.

Mouscron, 1 December 2015

For S.A. TRBA – S.A. TRAMO – S.A. TRAMOTRANS – S.A.S TRBA
